## CHARACTERIZATION

Fórum Florestal is a non-profit organization, accredited by the National Forest Authority and its main objective is to represent several organizations related to the forest economy.

Nowadays, integrates 54 Forest Landowners Organizations in a cooperative and entrepreneurial logic of a professional network for supporting the forest landowners.

It presents itself as a privileged partner for research, market, communication, and defense of the national forest interests near the political power.

## MISSION

With a proactive and dynamic vision, Forum Florestal supports the development of new services and forest products.

Promotions of partnerships and initiatives that increase the competitive edge of the National Forest.

Development of a professional, integrated and innovative associative strategy, that intends to support the forest landowner.

## AREAS OF ACTIVITY

Consolidation of a professional and innovative network for supporting the forest landowners;

∴ Institutional representativeness

∴ Implementation of mechanisms for increasing the value of the Portuguese forest

∴ Development of mechanisms, supported in forest management, in order to reduce the negative risks of the forest

∴ Implementation of mechanisms for land consolidation and increasement of professional management;

∴ Creation of communication channels between the producer, the researcher, the state and the market.

∴ Professionalization, professional formation and information of sector agents.

## FOREST LANDOWNERS ORGANIZATION

The Forest Landowners Organizations are the most effective link with the forest landowner. With a team of capable forest engineers and technicians, these organizations are capable of a professional and responsible management of the Portuguese forest.

## NATIONAL DISTRIBUTION
